

Research Intern for Health Policy and System
Duke Kunshan University
Job Description

Position Overview:

The Duke Global Health Institute (DGHI) and Duke Kunshan University seek to hire full-time student research assistants (intern) at the graduate or undergraduate level to work at an innovative Global Health Research Center established by Duke Kunshan University in Kunshan, China. The Global Health Research Center is a new interdisciplinary program tied closely to health priorities and challenges in China and globally, and currently focuses on four research areas: health policy and systems, global environmental health, non-communicable chronic diseases (NCDs), and one health. The interns will work in the area of health policy and systems, specifically on China-Gates Tuberculosis Control Project – Project Evaluation.

Reports to:

Assistant Professor

Essential Duties:

Under the supervision of faculty and independently (listed in descending order of time allocation and priority),

- To conduct screening, data extraction and data analysis for the component of Chinese literatures;
- To conduct fieldwork involving collecting questionnaires, data entry, patient interview, and other field-related work;
- Any other research and administrative tasks required by the team leader.

Required Qualifications:

- Have strong interests and experiences in health policy research and global health research;
- Enrolled in a degree-granting educational institution; advanced undergraduate students considered;
- Proficient and experienced in using MS Office, EpiData, STATA or SAS (preferred, not required);
- Hardworking, fast learner, team player, and attention to detail;
- Thrive working in a multidisciplinary environment;
- Excellent oral and written communication skills, in both English and Chinese;
